(a) Logistic regression
PR-AUC (5-fold CV)
C (log scale; small C = strong penalty)
L2 train
L2 validation
L1 validation
(b) Random forest (200 trees)
min_samples_leaf (people per leaf, log scale)
train
validation
(c) LightGBM: validation
number of trees (log scale)
rate 0.01
rate 0.03
rate 0.1
rate 0.3
